Education

University of Management and Technology (UMT) — Pakistan
BS Information Technology (Currently in 7th Semester) — *2023 – 2027*

Ideal College of Science — Pakistan
FSc (Pre-Engineering) — *2022 – 2023*

O.P.F Public School — Pakistan
Matric (Science – Biology) — *2020 – 2021*

Experience

Data Analysis — Oct 2026 – Present
Syntecxhub — *Remote*

- Cleaned and analyzed a 3-year retail dataset (1,164 records) and built an interactive Chart.js dashboard for revenue, profit, and growth (Repo)
- Segmented 4,338 customers into 6 groups using RFM analysis, with targeted marketing recommendations (Repo)

Data Science — Oct 2026 – Present
Arch Technologies — *Remote*

- Built a Titanic survival classifier (81% accuracy, Random Forest) and an AAPL next-day price regression model in Python (Repo)

Flutter & Mobile App Development — Aug 2026 – Sep 2026
Big Brains — *Remote*

- Completed a 30-day program with a 99% average score and a Letter of Recommendation
- Built Bloomé, a full Flutter shopping app, using GetX, MVC, Firebase Auth, and Firestore

Artificial Intelligence & Machine Learning — Aug 2026 – Sep 2026
Big Brains — *Remote*

- Completed a 30-day program with a 97% average score and a Letter of Recommendation
- Implemented Logistic Regression, KNN, SVM, Decision Tree, and Random Forest; built and deployed a Loan Approval Prediction app

Projects

Loan Approval Prediction | *Python, Scikit-learn, Streamlit* — Live | Repo

- Compared 5 classification models on 4,269 records; best result 79.86% accuracy and 0.87 ROC-AUC
- Identified credit score as the strongest predictor and deployed the model as a web app

Bloomé – Flower Bouquet Shopping App | *Flutter, GetX, Firebase* — Repo

- Built browse, search/filter, favorites, cart, checkout, and order tracking, with light/dark mode

BudgetLens – Expense Tracker | *HTML/CSS/JS, Node.js, Express* — Frontend | API

- Built a responsive dashboard with budget progress and category breakdown, plus a REST API with CRUD endpoints and input validation

AI Face Mask Detection | *Python, TensorFlow, OpenCV* — Repo

- Built real-time webcam mask detection using a CNN, with confidence scores and a Tkinter GUI

Dockerized 2048 Web App | *Docker, Nginx, Railway* — Live | Docker Hub | Repo

- Containerized the open-source 2048 web game with Docker (Nginx), published the image to Docker Hub, and deployed it live on Railway.

ExploreWorld – Travel Agency Website | *HTML, CSS, JavaScript, PHP, MySQL* — Repo

- Built a responsive multi-page travel site with destinations, packages, and contact pages
- Implemented user signup/login, an online booking form, and a contact form, all storing data in a MySQL database via PHP

Technical Skills

Languages: Python, Dart, JavaScript, SQL, PHP, HTML, CSS
AI / Data: Pandas, NumPy, Scikit-learn, OpenCV, TensorFlow/Keras, Streamlit, Chart.js
Mobile: Flutter, GetX, Firebase (Auth, Firestore)
Web / Backend: Node.js, Express, REST APIs, MySQL
Cloud & DevOps: Docker, Docker Hub, Railway, Vagrant, VirtualBox, Linux (CentOS), Nginx, Git & GitHub
Currently Learning: React, TypeScript, Gen AI & LLM API Integration, ML fundamentals, Laravel
